PRE-QUALIFIED FOR Civil engineering
Environmental engineering

STATEMENT BY FIRM Founded in 1911, Tighe & Bond provides engineering and environmental services for clients in government, industry, healthcare, education, real estate, energy, and water/ wastewater markets. Engineering News Record annually ranks Tighe & Bond among the top design and environmental engineering firms nationally. ZweigWhite also has recognized Tighe & Bond several times as one of the best engineering firms to work for in the nation. Tighe & Bond's other office locations include Pocasset, Westfield, and Worcester, Massachusetts; Middletown and Shelton, Connecticut; and Portsmouth, New Hampshire. Tighe & Bond has 7 ME registered professional engineers among our 260-person staff. We also have 8 LEED APs, 3 New Hampshire professional geologists, and 3 Certified Professionals in Erosion and Sediment Control. Working in teams, they share diverse expertise to benefit our clients. Professional registrations cover a wide range of disciplines; personnel specialize in the following areas: Civil Engineering; Coastal Engineering; Demolition Specifications; Electrical Engineering; Environmental Engineering; Geographic Information Systems (GIS); Geotechnical Engineering; Health & Safety; Instrumentation & Control; Mechanical/HVAC; Parking Consultancy; Regulatory Compliance & Permitting; Remediation; Site Assessment; Site Development; ; Solid Waste Management; Structural Engineering; Traffic Engineering; Transportation Planning; Wastewater Management; and Water Resources Engineering For close to a hundred years, Tighe & Bond has engineered the infrastructure of countless cities and towns throughout New England. We've designed roads, bridges, and drainage management systems, dams, industrial parks and academic facilities and all the utilities they require. We provide site planning services, cost-effective design, bid supervision and construction oversight. Regulatory experts on staff help ensure that permitting is achieved as smoothly and swiftly as possible with federal, state and local authorities. Our environmental expertise spans many disciplines, and allows us to deliver invaluable services to our clients. With environmental engineers and scientists, we provide expert advice to help organizations and communities comply with complex, changing federal and state regulations and avoid costly penalties and fines. We conduct audits to evaluate current compliance status and work with clients to develop comprehensive environmental management systems tailored to minimize regulatory risk.
